STEP 4 Using a hex wrench, remove the two socket head cap screws from the Clutch Ferrule Cover to separate the cover halves.

STEP 5 Place the two halves over the ferrule and hold tightly together. If the Ferrule Cover seems loose over the cable ferrule, remove the cover. Remove the backing from one of the included pieces of double sided tape and attach it to the inside of the bottom half of the cover. Attach the other piece of tape to the inside of the top half.

STEP 6 Assemble the cover using the socket head cap screws removed in Step 4. Tighten securely.

NOTE: To ease installation, place the Cover over the ferrule with the holes facing up, loosely install the socket head cap screws (PIC 2), then turn the Cover around so the cap screws are underneath for the best appearance. Tighten the cap screws securely. PIC 3

NOTICE

It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not provide warranty coverage on products or components lost due to improper installation or lack of maintenance. Periodic inspection and maintenance are required on all fasteners.
